

Cas d'usages

Max-E :

Camera Station - DIT

- With **1 Max-E**, it is possible to power a lightweight video control room of **300 to 500 W** in mobile use:
 - Directing THIS
 - Monitoring
 - Wireless accessories

Up to **3 to 5 hours** of autonomy depending on the intensity and simultaneity of use.

Result :

A mobile, silent and CO₂ emission-free power supply, perfectly suited for film shoots and light to medium camera setups.

Small scene

A small, complete scene can be powered with **3 Max-E (7kWh)**:

- Sound system: 1 kW
- LED lighting: 1.5 kW
- Screens / control room: 0.5 kW

Total power: **~3 kW**

Up to **3 hours of autonomy**

Result :

A self-contained, silent and clean installation, perfect for events in city centers, in nature or on sensitive sites.

LED lighting

With just **1 Max-E**, it is possible to power:

- LED lighting: 0.3 kW
Up to **7h of autonomy** at full power

or

- LED lighting: 1 kW
Up to **2 h of autonomy**

Result :

A simple, quick-to-deploy solution, without cables or noise pollution, ideal for occasional or nighttime use.
